

**William A. Ambrose** is a geologist specializing in sedimentology and reservoir characterization. He received a Master of Arts degree in geological sciences in 1983 from the University of Texas at Austin. Before joining the Bureau of Economic Geology in 1987, he was involved in regional subsurface studies of the Yegua and Vicksburg Formations and the Wilcox Group in the Texas Gulf Coast. Ambrose has worked on a variety of projects at the Bureau, including characterization of Frio fluvial and deltaic reservoirs in South Texas, co-production of gas and hot brine from Oligocene reservoirs in the Texas Gulf Coast, evaluation of coalbed methane reservoirs in Rocky Mountain basins, and reservoir characterization and basin analysis studies in Venezuela and Mexico. He is currently a co-principal investigator of the Bureau's STARR (State of Texas Advanced Oil and Gas Resource Recovery) program, chair of the EMD Coal Committee, and co-vice chair of the AAPG Astrogeology Committee. His contact information is--email: [william.ambrose@beg.utexas.edu](mailto:william.ambrose@beg.utexas.edu) , telephone: 512-471-0258, address: Bureau of Economic Geology, The University of Texas at Austin, University Station, Box X, Austin, TX, 78713-8924.

## Publications

Ambrose, W. A., and Hentz, T. F., 2012, Shelf-edge deltaic depositional systems in the upper Woodbine succession, Double A Wells field, Polk County, Texas: Gulf Coast Association of Geological Societies Transactions, v. 62, p. 3–12.

Ambrose, W. A., and Hentz, T. F., 2011, Depositional systems and facies variability in tidally modified shelf and estuarine systems in the Pennsylvanian Cleveland Formation, Anadarko Basin, North Texas and western Oklahoma, *in* Ambrose, W. A., ed., Sequence stratigraphy, depositional systems, and hydrocarbon play analysis of the Pennsylvanian Cleveland Formation and Marmaton Group, Anadarko Basin, North Texas and western Oklahoma: The University of Texas at Austin, Bureau of Economic Geology, Report of Investigations No. 275, p. 35–66.

Ambrose, W. A., Johnson, B. E., Hammes, Ursula, and Johnstone, Dean, 2010, Sequence stratigraphic framework and depositional history of Oligocene Frio slope-fan, lowstand prograding wedge, and shallow-marine transgressive-regressive deposits in the Lavaca Bay area, Texas: Gulf Coast Association of Geological Societies Transactions, v. 60, p. 29–38.

Ambrose, W. A., Hentz, T. F., Bonnaffé, F., Loucks, R. G., Brown, L. F., Jr., and Wang, F. P., 2009, Sequence stratigraphic controls on complex reservoir architecture of highstand fluvial-dominated deltaic and lowstand valley-fill deposits in the Woodbine Group, East Texas field: regional and local perspectives: AAPG Bulletin, v. 93, p. 231–269.
